Professional Summary

Master's student in Computer Science at the Federal University of Amazonas (UFAM) with research interests in Software Engineering, Human-Centered AI, Human-AI Collaboration, and Large Language Models. My research focuses on AI-assisted Requirements Engineering, including persona generation and requirements elicitation using LLMs. Experienced in empirical software engineering, prompt engineering, and quantitative and qualitative research methods.

Education

Master's in Computer Science
Universidade Federal do Amazonas(UFAM),
April 2025 – Present

Bachelor of Science with Honours (Information Technology)
Universiti Utara Malaysia (UUM),
February 2013 – November 2016
Second Class Upper Division (3.25/4.0 CGPA)

Research Interest

- Software Engineering
- Requirements Engineering
- Artificial Intelligence for Software Engineering
- Human-Centered AI
- Large Language Models (LLMs)
- Natural Language Processing
- User-Centered Requirements Engineering

Master's Research

AI-Assisted Requirements Engineering Using Large Language Models

- Developing **SmartPATHY**, a prompt-based methodology for generating PATHY-aligned personas with LLMs.
- Developing **PATHY4RE**, an ongoing approach for generating functional and non-functional requirements from AI-generated personas.
- Conducting empirical studies involving prompt engineering, user evaluations, and quantitative and qualitative analysis.

Research Publications

2. Z.I Talba, K.J Ishaya, **G. Saleeman**, "Perception and Impact of AI Language Models in Kaduna State Higher Institutions: A case Study of ChatGPT" Journal of Science and Technology JOS&T (2023):60-68

3. Zainab Ibrahim Talba, **Ganiyat Saleeman**, Bayyina Lawal Kankia, (2023): "Customers Perception on the Use of Chatbots for Bank Services within Kaduna South". A paper presented at the National Science and Technology Forum (NSTF) conference held on 28th-31st Aug. 2023.
4. Ajibade M.T, Mora Hafsar, **Ganiyat Saleeman**, (2022): "The Use of ICT in Improving Inclusive Learning For Socio-Economic Development". A paper presented at the 2022 Maiden National Conference held on 30th Nov.– 2nd Dec. 2022.

Professional Experience

Lecturer III

Department of Computer Science

Kaduna Polytechnic, Kaduna, Nigeria

March 2020 – 2025

- Teaching undergraduate computing courses.
- Preparing laboratory sessions and practical exercises.
- Supervising student projects.
- Assisting with curriculum delivery and academic activities.
- Participated in research activities, including conference publications and collaborative academic projects.

Skills

Technical Skills

Programming & Development

- Java
- Python
- C/C++

Research Tools

- Overleaf
- JASP
- Atlas.ti
- Nvivo
- Excel
- Google Forms

Soft Skills

- Effective verbal and written communication skills
- Hardworking, highly committed and self-motivated
- Strong analytical and problem-solving abilities
- Detail-oriented and capable of working independently or as part of a team
- Time management and project coordination skills

Academic Scholarships/Awards

- GCUB-Mob Scholarship 3RD Edition - 2025
- Dean's Award 2015/2016 Academic Session

Professional Certification/Affiliation

- Certified Tester Foundation Level (CTFL)
Certificate Number: **24-CTFL 4-244117-12**
- Nigeria Computer Society (NCS).
Membership Number: **13413**

Languages

English (Fluent)

Arabic (Intermediate)

Portuguese (basic)

Yoruba (native)

Malay (basic)

Hausa (native)

Hobbies and Interests

- Learning and researching about trending technologies.
- Traveling and discovering new cultures and learning new languages.
